

A2 Level Accounting

The basis of Accounting is the process of recording, classifying, summarising and analysing transactions (usually in a business context). It is about measuring the performance of organisations and communicating that information to people who want or need to know (stakeholders – people who have some interest or share in the organisation). If you are good at Maths, are interested in accountancy as a career and would like to develop your communication skills, then this course will suit you.

A2:

Unit 3: Further Aspects of Financial Accounting

Unit 4: Further Aspects of Management Accounting
