

A2 Level Philosophy

Why do we exist? What is the meaning of life? When is a table not a table but a penguin? Is everything just a dream? Do animals think? Can robots fall in love? Does God exist? And, who am I anyway? Here are some of the questions that are often discussed when studying Philosophy. This course will inspire those of you who are interested in life's 'big' questions and are fascinated by people who have asked these questions, and tried to come up with answers.

A2:

Unit 3: Key Themes in Philosophy

Unit 4: Philosophical Problems
