

AS Level Psychology

Psychology is the study of people - how they act, react and interact. It is concerned with thoughts, feelings, motivations and underlying causes of behaviour such as biological and psychological explanations. AS / A2 Level Psychology does not focus on psychiatry or counselling but it does share core elements in these fields. Psychology is one of the fastest growing A Level subjects in the country, and Psychology graduates go on to work in a variety of professions after completing a degree. You will be given support and guidance to enable you to develop your skills, knowledge and understanding of AS and A2 Level Psychology. You will be introduced to a variety of concepts and research studies which you will explore and analyse in depth.

AS:

PSYA1: Cognitive Psychology, Developmental Psychology and Research Methods

PSYA2: Biological Psychology, Social Psychology and Individual Differences
