

GCSE Mathematics

This is a very intensive resit course taken by students who have already achieved a Grade D in GCSE Maths, or an equivalent. You will study Algebra, Shape and Space, Data Handling and Number, using a range of different activities and a great deal of exam practice. There is a mock exam in January. A few students who do well in January may be entered for the Higher Tier, but in most cases we aim to get you to grade C standard on the Foundation Tier. There are two exams in May – one with and one without a calculator. An A-C grade in GCSE maths is often a requirement for university study.

Entry Requirements		Course Duration	How will I be assessed		Where do I go from here			Exam Board		
4 GCSEs grade D including and or		1 Year	Coursework	Exam	BTEC National/Level 3	AS	Employment	AQA	EDEXCEL	WJEC
Maths	English
