

GCSE Physics

Do you need a Physics GCSE for your future career? If so, this one year, single award course may be for you. This course is largely geared to students who have already covered the GCSE course and want to improve their grades. It is also suitable for overseas students who want to progress to A Levels, but have not achieved the required GCSE qualifications to enable them to do so. GCSE Physics aims to provide you with a basic understanding of the principles and applications of physics, without which our technological society could not function. You will study mechanics, electricity, thermal physics, radioactivity as well as stars and space. In addition, you will consider ‘how science works’ and link this to scientific issues.

Entry Requirements		Course Duration	How will I be assessed		Where do I go from here			Exam Board		
4 GCSEs grade D including and or		1 Year	Coursework	Exam	BTEC National/Level 3	AS	Employment	AQA	EDEXCEL	WJEC
